

Item 1	Diameter	Voltage	Deliver time
Clear IR lamp	10mm/12mm(normally) or 14-20mm	120-480v	7 working days
Length	Power	Quantity / Price	
100-300mm	300-1500w		
300-600mm	500-2500w		
600-1000mm	500-3000w		
1000-1500mm	1000-3000w		

Carbon and tungsten Infrared lamp

Application :

For drying, heating the following materials:

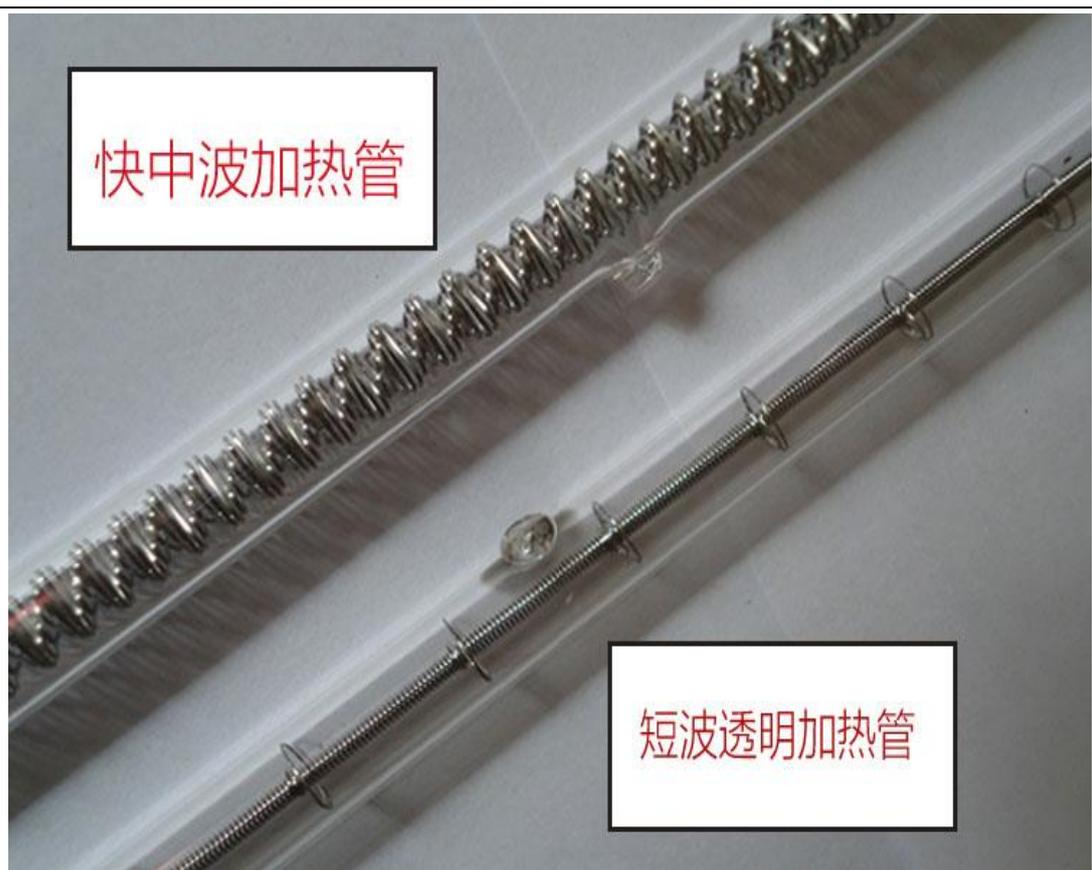

- Ink, water, paint (especially water-based paint and PU paint), powder coating, PTFE coating.

Applications:

- Leather ginning machine
- Screen printing machine: automotive glass, LCD screen, mobile phone screen
- Flocking machine
- Coater
- Production of transfer paper (ceramics, textiles, etc.)
- Car interior trim
- Digital presses
- Textile printing
- polishing machine, oil machine
- Glass mirror line
- furniture, sheet drying
- Paper, non-woven production
- Water-based paint, PU paint, powder coating curing
- Tape (PET tape, non-woven tape, etc.)

快中波加热管

短波透明加热管

Item 2	Diameter	Voltage	Deliver time
Ruby IR lamp	10mm/12mm(normally) or 14-20mm	120-480v	7 working days
Length	Power	Quantity / Price	
100-300mm	300-1500w		
300-600mm	500-2500w		
600-1000mm	500-3000w		
1000-1500mm	1000-3000w		

Red glass ruby lamps

Item 3

All around gold reflector heat lamp

Item 4	Diameter	Voltage	Deliver time
Half gold heater	10mm/12mm(normally) or 14-20mm	120-480v	15 working day
Length	Power	Quantity / Price	
100-300mm	300-1500w		
300-600mm	500-2500w		
600-800mm	1000-3000w		
800-1000mm	500-3000w		
1000-1500mm	1000-3000w		

Item 5	Diameter	Voltage	Deliver time
Half white lamp	10mm/12mm(normally) or 14-20mm	120-480v	7 working days
Length	Power	Quantity / Price	
100-300mm	300-1500w		
300-600mm	500-2500w		
600-1000mm	500-3000w		
1000-1500mm	1000-3000w		

Item 6	Diameter	Voltage	Deliver time
Twin tube lamp	11x23mm/ 15x33mm	120-480v	15 working day

For this type of lamp , it's hard to send exact price, but we will offer good price when you need it !

We have Medium wave , Short wave lamps. The filament can be Tungsten , carbon, Ni-Cr . Coated with gold reflector or white .

Application :

1. Surface coating, water and ink for rapid drying, curing and activation.

2. Softening the surface material for post-processing. Applicable substrate material is very wide:

- glass, sheet metal, wood, paper, textiles, leather and so on. Applicable to a lot of coating:
- Ink, water, paint (especially water-based paint and PU paint), powder coating, PTFE coating.

Application of the way:

- Mainly a similar way to mobile heating in tunnels.
- Leather ginning machine • Screen printing machine: Car glass, LCD screen, Mobile phone screen • Flocking machine • Coater • Transfer paper production (ceramics, textiles, etc.) • Automotive interior trims • Digital presses • Textile printing • Polishing machine, oil machine • Glass mirror line • Industrial production • Paper, non-woven production • Water-based paint, PU paint, powder coating curing • Tape (PET tape, non-woven tape, etc.)
